PROFESSIONAL SUMMARY

B.Tech graduate in Electronics and Communication Engineering with hands-on experience in Core Java, SQL, PostgreSQL, JDBC, Hibernate and Spring Boot. Built a full stack Movie Seat Booking application with REST APIs and an IoT-based traffic safety system. Familiar with HTML, CSS and JavaScript. Seeking an entry-level Java Developer opportunity to build reliable and efficient software applications while continuously growing in modern technologies.

EDUCATION

B.Tech — Electronics and Communication Engineering 2021 – 2025
Sri Venkateshwara Institute of Technology, Anantapur | Score: 78.35%

Intermediate (MPC) 2019 – 2021
S.L.N Junior College, Anantapur | Score: 91.5%

Secondary School Certificate (SSC) 2018 – 2019
Z.P High School, Settur | Score: 9.7 CGPA

TECHNICAL SKILLS

Programming Language:	Core Java — OOP, Collections, Exception Handling, Multithreading
Database:	SQL, PostgreSQL — DDL, DML, Queries, Joins, Aggregate Functions
Connectivity:	JDBC — CRUD Operations, DriverManager, Statement APIs
ORM:	Hibernate — ORM Basics, Entity Mapping, Session Factory
Framework:	Spring Boot — REST APIs, Spring Data JPA, Validation, Exception Handling
Frontend (Basics):	HTML (Forms, Tables) | CSS (Box Model) | JavaScript (DOM, Fetch API)
Tools & IDE:	Eclipse IDE | Maven | VS Code | Postman | Git & GitHub
Soft Skills:	Self-Learning | Self-Motivated

PROJECTS

Movie Seat Booking [Full Stack Project] 2026
Technologies: Java, Spring Boot, Spring Data JPA, PostgreSQL, HTML, CSS, JavaScript, Postman, Git
GitHub: github.com/pdilshadpdilshad553/seat-booking-project

- Built a full stack movie ticket booking app with REST APIs for shows, seat maps and bookings using Spring Boot, Spring Data JPA and PostgreSQL.
- Designed a PostgreSQL schema with 5 related tables: movies, screens, shows, seats and bookings.
- Prevented double booking with @Transactional and pessimistic row locking; added validation and global exception handling (HTTP 201, 400, 404, 409).
- Built an 8x10 seat selection UI with live seat counts using HTML, CSS and JavaScript (Fetch API); tested APIs in Postman.

Smart Traffic Surveillance System [Main Project] 2024 – 2025
Technologies: ESP32-CAM, Image Processing, Cloud Monitoring

- Developed an automated helmet detection system for two-wheelers to improve traffic safety compliance.
- Implemented image capture and decision logic to control bike ignition based on helmet detection.
- Integrated cloud-based monitoring module for real-time data storage and remote system tracking.

CERTIFICATION & TRAINING

Java Full Stack Development — Jspiders

- Completed training in Core Java, SQL, JDBC, Hibernate, Spring Boot, HTML, CSS and JavaScript.
- Gained hands-on experience in full stack Java web application development.

DECLARATION

I hereby declare that all the information above is true and correct to the best of my knowledge and belief.
